## Technical Project Team Subgroups

Chemistry Stephanie Pingree Buss

## Communication JoAnn Grady

**Drinking Water**Cindy Christian

## Characterization and Remediation Ann Farris

**Toxicology** Stephanie Pingree Buss Emerging
Contaminants
Denise Elston

Source Control Tom DeRuyter

Goal
To ensure that only
high quality data
are used for risk
evaluation and
cleanup

Goals
To maintain lines
of communication
among TPT members; and to ensure
that all stakeholders are informed on
the project status

Goals
To ensure an alternate permanent drinking water supply for all impacted areas

Goals
To ensure a thorough investigation of the sources and extent of contamination; and to oversee the control and cleanup of the contamination

Goal
To evaluate the
potential risk of
adverse health
effects caused
from the exposure
of contaminants
from the North Pole
refinery's history of
spills

Goals
To understand the physical, chemical and biological characteristics of sulfolane; to determine if sulfolane is a contaminant of concern at other facilities or contaminated sites in Alaska; and to evaluate the need for regulatory change

Goal
To ensure that no ongoing releases are occurring and to aggressively address any new spills
